

Maximize your security. Minimize the damages.

Technology companies are becoming more driven by data. As the dependency on data grows, there is an increasing need to protect this data from constant and consistent threats. In order to safeguard against cyber-driven disruptive scenarios, more and more technology companies are looking to partner with carriers that understand their needs. Let us help. Nationwide's enterprise cyber insurance coverage for technology is a service-based solution designed to complement and enhance your organization's cyber risk profile. Not only do you have a creative solution that fits your needs, but policyholders have access to loss prevention services, breach response and remediation expertise, and an experienced claim team.

Cyber exposure for technology industry:

- Interdependency between a large network of business partners
- Human errors and omissions
- Remote portals into central network
- Large amounts of customer and employee data

Who we insure:

- Companies that offer technology-based services, such as vendors
- Technology companies that store, collect, or transmit customer data (cloud providers)
- Application service providers
- Network developers, managers or consultants
- Telecommunications and wireless service providers

Contact us today to find out how we can provide the latest in cyber coverage to address your specific needs:
