

Cyber liability coverage for e-commerce

A.M. Best rating of A+ (Superior), FSC XV

Maximize your security. Minimize the damages.

E-commerce companies by their very nature are more susceptible to cyber attacks. Thanks to online shopping, the rise of digital currency has vastly changed the ecommerce environment in the last decade. E-commerce companies are now looking to partner with insurance companies that can address their increasing exposure and meet their specific needs. Let us help. Nationwide's enterprise cyber insurance coverage for E-commerce is a service-based solution designed to complement and enhance your organization's cyber risk profile. Not only do you have a creative solution that fits your needs, but policyholders have access to loss prevention services, breach response and remediation expertise, and an experienced claim team.

Cyber exposure for e-commerce companies:

- Common content management system
- Shopping cart software that manages customer credit card information
- Automated software attacks to gain access to passwords
- Attacks on servers that hosts e-commerce sites

Who we insure: e-commerce sub-sectors

- Online professional services
- Apparel, accessories & jewelry
- Consumer goods
- Home, appliance and electronics
